STATE OF SOUTH CAROLINA

# DEPARTMENT OF EDUCATION

Dr. Barbara Stock Nielsen  
State Superintendent of Education

To: The Honorable Carroll A. Campbell, Jr.  
Governor of South Carolina

The Honorable Members of the South Carolina General Assembly

Submitted herewith is the Annual Report of the South Carolina Department of Education for the fiscal year that ended June 30, 1994.

Sincerely,

A handwritten signature in dark ink that reads "Barbara S. Nielsen". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Barbara S. Nielsen, Ed.D.  
State Superintendent of Education

1993-94 Graduates by High School	23
College Enrollees from 1992-93	72
Salaries of Superintendents, Principals and Teachers	73

## **Dr. Barbara S. Nielsen** **State Superintendent of Education**

South Carolina's goal is to set high academic standards for, and offer enriched programs to, all students. We believe all children can learn at high levels, and we are designing a new education system to meet that higher level of expectation.

We are emphasizing preschool preparation and building strong primary- and elementary-level programs that include instruction in foreign languages and computers. We are working to restructure middle schools to meet the needs of students who once were in "no man's land." At the high school level, we are emphasizing stronger requirements for all students, whether they are headed for college or technical training. All of these changes have been accompanied by unprecedented levels of positive interaction between the public K-12 schools, technical schools, colleges and universities.

Although current education initiatives in South Carolina are complex and far-reaching, the system focuses on the answers to just three questions:

- What should students know and be able to do, and how do we know when they know it?
- What are the many best ways to get this done?
- How can we work together to get it done?

The answers to these questions are coming not only from the State Department of Education, but also from teachers, principals, support staff, district offices, school boards, students, businesses and community members across South Carolina. We believe it takes the efforts of an entire community to create a climate for change and continuous improvement.

The creativity and innovation we hope to develop in our students is also an essential ingredient for changing the system. And the keys to success lie in local decision-making, local flexibility and local commitment.

## Highlights of 1993-94

The 1993-94 school year was an exciting one in South Carolina, with a solid record of accomplishments by our students, educators and legislators. Here are some highlights:

### The School-to-Work Transition Act of 1994

This major piece of education legislation is designed to give high school graduates stronger academic skills and better career opportunities.

The Education Department played a key role in developing the new law, which is the result of years of research, pilot programs, discussion and debate by educators, parents, business people, policy-makers and state agency representatives. It eliminates the so-called high school "general track," which is not rigorous enough to prepare students either for further education or good careers. The "general track" will be replaced by the Tech Prep path and its "applied academics" courses, which are designed to connect academic skills with real-world situations.

Here are some key provisions of the new law:

- Students will have the option of taking Tech Prep or college-prep curricula beginning in the ninth grade, but they will be able to move between the two paths.

- Applied academics courses in the Tech Prep strand will be rigorous, with the state Department of Education and local school districts assuring that the courses have the equivalent quality of college-prep courses.

- School districts will have until 1996-97 to eliminate the general track, but districts may appeal to the State Board of Education for a one-year waiver if they claim a hardship.

- Career information and counseling will be provided for students beginning in sixth grade. In early and middle grades, students will have the opportunity to learn about careers when business people visit schools or when students visit work sites. Career guidance will become more specific as students move into their high school years.

- By the 11th grade, students will have opportunities for more direct experience about various careers through youth apprenticeships and internships with businesses.

The School-to-Work Transition Act provides a structured process that links the State Department of Education, the State Board for Technical and Comprehensive Education, South Carolina's 16 technical colleges, employers and the State Employment Security Commission in a collaborative effort.

Sixteen regional Tech Prep consortia in South Carolina will work with the 16 technical colleges, local districts, employers and community leaders to provide local leadership for planning and implementing the school-to-work effort.

Tech Prep makes education more rigorous, meaningful and rewarding for the majority of South Carolina's high school students — the 63 percent who do not attend a four-year college or university. The 37 percent who do go to college already benefit from solid preparatory programs, but too often students are held back in low-achieving “general track” courses that are too easy and prepare students to go nowhere: not to college, not to post-secondary training and not to a good job.

Tech Prep is effective for all students: those who enter the work force directly after high school; those who continue their education after high school with at least two years of technical training; and also those who haven't decided what to do after high school but want to keep alive the option of attending a technical, two-year or four-year college.

## **Education Initiatives**

■ **Curriculum Frameworks** — The State Board of Education approved curriculum frameworks in mathematics, visual and performing arts and foreign languages. Written by teams of top state K-12 and higher education teachers, the curriculum frameworks reflect South Carolina's vision of quality education. Five more frameworks — in science, language arts, health/safety, history/social studies and physical education — currently are in development. The frameworks set clearly defined and ambitious standards for what students should know and be able to do in each subject area at grade levels through the K-12 system.

■ **Statewide Systemic Initiative** — The Education Department received a \$9.7 million grant from the National Science Foundation to help support mathematics and science teachers, programs and curricula. The grant, called the Statewide Systemic Initiative, is being used to establish 13 regional Hubs that will serve as delivery networks to help train teachers, share ideas and resources and deliver services to schools. All 13 Hubs are in operation.

■ **School safety** — The SDE recommended a number of actions that the Legislature, state agencies, schools, districts, communities and parents should take to help reduce violence in South Carolina schools. The department's safety plan is based on a report by the Action Group on School Safety which was composed of 50 citizens appointed by Superintendent Nielsen. Then, in the spring, the Legislature passed the far-reaching Schoolhouse Safety Alliance Act, which makes the Education Department a key player in aiding local districts and schools with safety issues.

■ **South Carolina Goals Panel** — A draft report on improving South Carolina's schools as required by the General Assembly was forwarded to the South Carolina Education Goals Panel for review. The panel will develop South Carolina's plan to reach the National Educational Goals by the year 2000. Other sources for the plan include reports by the Educational Excellence Teams, the South Carolina Collaboratives Council and the South Carolina Chamber of Commerce Business Center for Excellence in Education.

■ **Implementation of Act 135** — The Education Department developed implementation plans for the Early Childhood Development and Assistance Act, also known as Act 135.

This law is designed to give all students assistance that is flexible and tailored to their individual needs and learning styles, with a particular focus on ensuring academic success early in every child's schooling. It is designed to focus the state's resources on preventing academic problems before they occur.

■ **Courses for college-bound students** — Superintendent Nielsen worked with the the State Board of Education to recommend a list of courses that South Carolina public school students should take if they plan to attend college. Students who take more rigorous academic courses score higher on the Scholastic Aptitude Test and make better grades in college.

Students who take the State Board-recommended courses would accomplish five key goals:

- 1.) They would get their high school diploma.
- 2.) They would meet course requirements for students planning to attend a four-year post-secondary institution, as outlined by the state Commission on Higher Education.
- 3.) They would meet requirements for students planning to attend a two-year post-secondary institution.
- 4.) They would be academically prepared to score well on the SAT.
- 5.) They would be well-equipped to compete with other students from across the nation and around the world.

■ **South Carolina Education Profiles** — The SDE developed education "Profiles" on the state's 91 school districts and more than 1,100 individual schools. Each profile contains demographic information and five-year student test scores on that district or school. The extensive reports examine numerous facets of education, including demographic data on students and teaching staff, attendance and dropout rates, and promotion and retention rates. In addition, they are easy to understand and use, enhancing their value as a tool for communities to use in forming local strategic plans.

❁ **Character education** — Superintendent Nielsen and the State Board of Education urged South Carolina communities to help respond to problems of youth violence and school discipline by refocusing on traditional traits of good character. The department and board sponsored discussions across the state to help communities come together and find ways for schools to reinforce basic community ideals. Some traits suggested by Nielsen and the board members were honesty, self-discipline, respect and responsibility.

■ **African-American Males Action Team** — The State Board of Education appointed this group of South Carolinians to study the needs and problems that interfere with the education of young black males, who tend to have higher dropout rates and lower test scores than other students. The team developed a series of recommendations that it presented to the State Board, which in turn directed the Education Department to develop appropriate steps based on those recommendations and bring them back to the Board in early 1995.

■ **A big birthday** — South Carolina celebrated 25 years of kindergarten. The state one of only 12 that have mandatory kindergarten for all children.

## Testing

■ **The SAT** — A detailed report on the 1994 Scholastic Aptitude Test provided the most dramatic evidence yet that South Carolina students who take tougher courses in high school will score better on the SAT.

The 1994 SAT report showed that South Carolina students who had taken 20 or more academic credits had an average score of 932, 30 points higher than the national average and 94 points higher than the state average.

Overall, South Carolina's average SAT score of 838 was the same as last year, up one point in mathematics and down one point in verbal. Those changes mirrored the nation as a whole. Nationwide, students' average score of 902 was unchanged from last year, with a one-point increase in math and a one-point decrease in verbal.

■ **The ACT** — The American College Test, like the SAT, is used to predict a student's success in his or her freshman year of college. Although the SAT is the predominant test in South Carolina, the ACT is used predominantly in most states. A total of 3,826 students took the ACT in 1994, with a composite score of 19.1 out of a possible score of 36. The national average was 20.8.

■ **AP tests** — On Advanced Placement tests, a 5 is the best possible score, and a high school student who scores 3 or better may receive college credit for the subject covered by that test.

The percentage of South Carolina students qualifying for college credit in this way increased from 53 percent in 1993 to 55 percent (6,658 out of 12,125) in 1994. South Carolina student participation in AP courses is among the highest in the nation. The three most-taken AP exams in South Carolina were U.S. History, English Literature and Composition, and Calculus AB.

■ **Stanford 8** — Results from the 1994 Stanford 8 continued a four-year trend of greater numbers of South Carolina students moving out of the bottom quarter and greater numbers moving into the top quarter in their math, reading and language skills.

More than 226,000 students in grades 4, 5, 7, 9 and 11 took part in the statewide Stanford 8 administration. The test results allow South Carolina educators to compare state students with a national norm derived from students tested in 1988.

The encouraging movement of South Carolina students into the top 25 percent nationally and out of the bottom 25 percent was particularly evident among fourth-graders, the youngest students taking the test.

The Stanford 8 results showed South Carolina students scoring at or above the national 50th percentile in 11 of 20 testing categories. Superintendent Nielsen said the curriculum reforms she has introduced are needed to help those numbers improve.

To address these concerns, Nielsen presented to the State Board a list of policy recommendations, including:

1.) Schools should ensure that appropriate instruction is provided in the early grades, as required by Act 135, so students acquire by the end of Grade 3 the basic skills and competencies they need to succeed.

2.) The Mathematics Curriculum Framework adopted by the State Board last year should continue to guide improvements in instruction. Instructional materials that support the framework should get priority funding in next year's budget.

3.) The English/Language Arts Framework will be ready for extensive public review and comment in early 1995. After it is revised, and then approved by the State Board, instructional materials to support that framework should be given priority.

4.) Professional development offerings for teachers should be coordinated with the frameworks, and staff development activities should be coordinated with the 13 new regional Hubs for mathematics and science.

5.) New Tech Prep "applied" courses that link academic learning with real-world situations — a focus of the recently approved School-to-Work Transition Act — should improve math, reading and language skills in the areas identified as weaknesses in grades 7, 9 and 11.

■ **BSAP testing** — The scores of South Carolina students on the 1994 Basic Skills Assessment Program were down from the previous year, and Superintendent Nielsen pledged technical assistance to local school districts where student scores decreased.

For the first time, the test scores were analyzed by a testing expert outside the State Department of Education. Dr. Loren Anderson, a nationally recognized testing authority from the University of South Carolina College of Education, provided an in-depth analysis of BSAP data for the agency.

Anderson's report said the trend in recent years toward decentralization has placed the burden of responsibility for education quality "squarely on the shoulders of the local community. Since this responsibility will be accepted more readily in some districts than in others, different impacts of deregulation and decentralization on student achievement are to be expected."

## **Trends to watch**

■ **Dropout prevention** — More South Carolina Students are surviving the critical "dropout-prone" years of grades 8-12. The state's "completion rate" — the number of eighth-graders in 1988-89 compared with the number of students who receive high school diplomas or certificates in 1992-92 — increased from 69.5 to 69.9 percent. The completion rate has been climbing steadily for the last three years.

■ **Full-service schools** — As they looked for ways to deliver services to children and families more effectively, a growing number of schools began opening their doors to service agencies and community organizations. State agencies now working directly through schools include the departments of Mental Health, Social Services, Health and Environmental Control and Youth Services.

■ **Service Learning** — South Carolina has become a national leader in establishing Service Learning programs, where students are given a chance to perform community service work that complements their classroom work. Teachers use Service Learning to reinforce academic skills taught in the classrooms, and students discover that the skills and knowledge they acquire in school can have a real-world impact.

■ **New school buses** — The General Assembly vote to fund the purchase of 2,000 schools buses. One-third of the state's aging 6,000-bus fleet will be replaced, allowing the Education Department to retire buses as old as 17 years that are still being used to transport children.

■ **Technology** — Schools across South Carolina are embracing technology as both a teaching technique and tool. In some schools students routinely link up through telecommunications with students around the world, and computer keyboards, laser-discs and electronic encyclopedias are becoming commonplace. To accelerate the use of technology, the Education Department put together a statewide technology plan with the active input of a team of teachers, administrators, parents, business partners and state agencies.

■ **FrEd Mail** — The Education Department provided FrEd Mail (Free Educational Electronic Mail Network), a telecomputing service, for public schools. It allows teachers and students to participate in learning activities with schools across the state and around the globe.

## Honors and Recognitions

■ **Blue Ribbon** — All 11 of South Carolina's nominees in the U.S. Department of Education's Blue Ribbon Schools Program were named national winners. The winners were:

- Harbor View Elementary (Charleston).
- Mitchell Elementary (Charleston).
- Orange Grove Elementary (Charleston).
- Oakbrook Elementary (Ladson, Dorchester 2).
- Summerville Elementary (Summerville, Dorchester 2).
- Joseph Keels Elementary (Columbia, Richland 2).
- L.W. Conder Elementary (Columbia, Richland 2).
- Augusta Circle Elementary (Greenville).
- Dutch Fork Elementary (Irmo, District 5 of Lexington/Richland).
- Greeleyville Elementary (Greeleyville, Williamsburg County).
- Lake City Primary (Lake City, Florence 3).

■ **Teacher of the Year** — Cathy S. Scott, a physics, space science and astronomy teacher at Lexington High School, was named 1995 State Teacher of the Year. Last year's State Teacher of the Year, Dodie Magill of Greenville, was a finalist for National Teacher of the Year honors.

■ **Milken Awards** — Three South Carolina elementary school teachers and two principals were selected to receive 1994 Milken Family Foundation National Educator Awards, and the accompanying unrestricted financial prizes of \$25,000. This was South Carolina's first year in this prestigious national program, which includes 29 other states. Middle and high school educators will be recognized next year.

This year's winners were David Foster, a fifth-grade math and science teacher at North Springs Elementary School in Columbia's Richland District 2; Lisa Frampton, a physical education teacher at Sara Collins Elementary School in Greenville; Barbara Wilson, a fourth-grade teacher at Styles Point Elementary School in Charleston; Cheryl Floyd, principal of Lake City Primary School; and Jacquelyn Brown, principal of Mitchell Elementary School in Charleston.

■ **State Board Awards** — More than 70 businesses, individuals and organizations were honored for their contributions to public education in the annual State Board of Education Awards Program.

■ **Verner Award** — The Education Department received the state's highest award for contribution to the arts in South Carolina. Gov. Campbell presented Superintendent Nielsen with the prestigious Elizabeth O'Neill Verner government award for the Department's Visual and Performing Arts Curriculum Framework and other arts education initiatives.

				* STATE TOTALS	606,265.40	632,268.47	651,422

\* The totals are calculated figures found by dividing the number of days in membership/attendance by 135.

TABLE 2  
1993-94  
SUMMARY OF PUPIL ATTENDANCE AND MEMBERSHIP  
BY GRADE

<u>GRADE</u>	<u>AVERAGE DAILY ATTENDANCE</u>	<u>AVERAGE DAILY MEMBERSHIP</u>
Kindergarten	43,469.15	45,719.68
1st Grade	51,647.90	53,626.73
2nd Grade	49,554.72	51,194.65
3rd Grade	49,806.35	51,395.57
4th Grade	48,820.82	50,373.13
5th Grade	49,456.94	51,101.62
6th Grade	50,667.27	52,709.50
7th Grade	50,339.19	52,758.99
8th Grade	47,989.97	50,475.79
9th Grade	53,939.76	57,188.18
10th Grade	42,445.66	44,530.49
11th Grade	35,931.99	37,551.76
12th Grade	32,195.56	33,642.38
Totals	606,265.40	632,268.47

Includes Felton Lab, Juvenile Justice, Palmetto Unified and Multi-Handicapped of SC Deaf/Blind.  
Figures are calculated by dividing the number of days in membership by 135.

Source: Professional Certified Staff File, 1993-94. Codes for each position category are given in parenthesis under each column heading.

<sup>a</sup> Full-time equivalency (FTE) is the amount of employed time required in a less than full-time position expressed in proportion to that required in a full-time position. All full-time equivalencies represented in the above table are expressed in tenths.

<sup>b</sup> Includes teachers for grades K-12.

<sup>c</sup> In this single district county, area vocational center (AVC) personnel are reported as county office staff.

<sup>d</sup> All staff are included for the School for the Deaf and the Blind since this school receives funds from the Education Improvement Act.

Source: South Carolina Department of Education, Office of Organizational Development, *Accreditation of School Districts in South Carolina Annual Report, 1993-94* and "Department of Education School Organization List, May, 1994."

<sup>a</sup>Includes elementary schools having an organization with any combination of Grades 5-8.

<sup>b</sup>Includes five kindergartens located in child development centers (indicated by an \* in the appropriate districts) and elementary schools with any combination of Grades K-8 which are not classified as middle schools.

<sup>c</sup>Includes secondary schools with any combination of Grades 7-9.

<sup>d</sup>Includes secondary schools with any combination of Grades 7-12 which are not classified as junior high schools.

<sup>e</sup>Includes single- and multi-district area vocational centers. Area vocational centers which serve multi-school districts are illustrated by their geographical location or the district through which they report.
